

# TRANSFER<sup>RP</sup>

COLOR PROFILE • WHITE CONTROL • RASTERIZATION

- Up to 6x Faster Printing through Accelerated Processing in the RIP
- Up to 40 % less Toner Consumption through Rasterization and White Toner Reduction
- Auto-Cropping
- Support of most Common File Formats
- Color Management for Professional Requirements
- Selective Color Correction (Changing Colors)
- Removal of Color Regions in Various Tolerances
- Importing of Multi-Page Files
- High-Resolution Preview to Prevent Failure
- Rasterizing like a Professional with just a Single Click
- Immense Increase in Wash Resistance through Rasterizing

**RASTERDESIGN**  
with only 1-Click!

**OKI A4 & A3  
WHITE TONER PRINTERS**

ES9420WT/C920WT

**NOW AVAILABLE!**  
**FOREVER  
TRANSFER MEDIA**

**VECTOR DESIGN!**  
with excellent color reproduction!

**FOREVER TransferRIP**, in combination with the FOREVER transfer media and the OKI White Toner printers, opens up incredible opportunities for all users.

This Software enables the user to run small productions at high resolution efficiently and with a result that is even softer than screen printing on the textile. Even if it is about producing one single transfer!

### **Fully Automated Design-Cropping!**

The most common formats, such as EPS, PSD, PDF, TIFF, JPG, can be imported easily. At the same time, the software detects alpha channels and cutting paths, creates and saves these for your images automatically.

### **Color Management for Professional Requirements!**

With the selective white toner control, as well as the specially for FOREVER Transfer Media tuned color profiles, the user receives optimal color reproduction.

Nevertheless, the user has multiple settings such as brightness, contrast, saturation and selective color correction to adjust the image according to his personal needs.

### **Up to 40 % Printing Cost Savings due to Lower Toner Consumption!**

This is achieved through selective reduction of white toner, rasterization and the optimal use of the textile color as a toner replacement in the design.

### **Tremendous Improvement of Wash Fastness!**

Rasterized designs can be washed better than full scale designs, because the mechanical abrasion of the printed image is minimal in comparison.

Excellent results were especially achieved with polyester fabrics that were washed more than 40 times at 40°C without losing image quality.

These are just a few of the benefits and opportunities that the user receives with the new software.

Test it today and make your own impression of this brilliant *White Toner System Improvement*.

A download link for the test version will be provided on request.

The usage of the independent software is via USB-Dongle, which offers the flexibility of operating on different workstations.
