

This document covers how to perform a nozzle check on the PrintPerfect 600S printer. A nozzle check should be performed immediately after installation of inks. It should also be performed if any undesired white or light lines are noticed in printed artwork. Work time < 1 minute

PrintHead Nozzle Check Procedure:

1. Load one piece of letter sized plain paper into the paper tray
2. On the Printer touchscreen, select the **Setup** icon

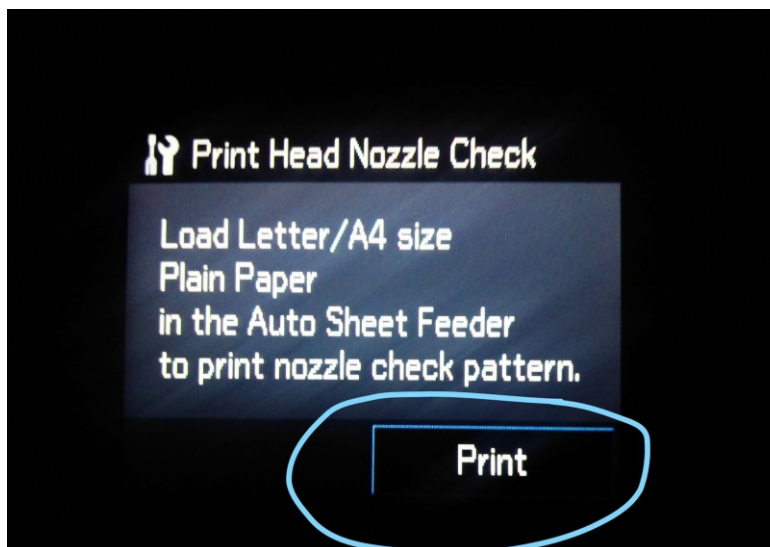

3. Select **Maintenance** from the Setup menu

- Next, choose **Print Head Nozzle Check**

- Print** the Nozzle Check

6. Check for gaps in the print pattern. Please note that there will be two gaps in the nozzle pattern representing the Clear White ink.
